Continuing the themes from previous years, we welcomed contributions related to Clouds, Precipitation, Circulation, and Climate Sensitivity. All participants were invited to join the live discussions at the virtual poster halls at Gather Town.</p> <p>The meeting was so successful, with over 326 registered participants, including 46 early career scientists, and about 140 people presented posters (see the meeting agenda). In addition, two keynote presentations were given.</p>  | 330<br>(300/30)        |

The combination of these instruments will provide three-dimensional distributions of clouds with vertical motion, aerosols, and precipitation and their radiative characteristics.</p> <p>In this workshop, we first introduce ECARE to modelers: What's new with ECARE, and what are major physical quantities to be derived from ECARE. Then, we discuss the key topics for collaboration between models and EarthCARE.</p> | 70<br>(35/35)          |
